

POLYION-40

Polyion-40 is organic dispersant

TECHNICAL DATA

Solids : 40 ± 1 %

pH : 7-8

Viscosity (m.Pa) : 200

Appearance : Clear Solution

FEATURES & BENEFITS

POLYION-40 is an organic dispersant used mainly to disperse calcium carbonate slurries of high solid. It can be used to disperse typical coating color formulation containing Kaolin & calcium carbonate.

ADVANTAGES

- Good cost performance.
- Allow lowering the viscosity at the time of initial formulation.
- Maintain a low viscosity during storage.
