

## **SMOOTHCOAT-20**

*(Polyethylene Wax Emulsion)*

Smoothcoat-20 is an aqueous dispersion of polyethylene wax.

### **TECHNICAL DATA**

Solids : 20 ± 1 %

---

pH : 6-8

---

Viscosity (cps) : 100-150

---

### **FEATURES & BENEFITS**

This is a special fine particle size lubricant for pigments, developed from special high melting point waxes. When compared with calcium stearate lubricant, Smoothcoat-20 has very fine particle size giving maximum coverage. Smoothcoat-20 has tendency to adhere on pigment surface, normal lubricants doesn't have this property hence they may drain.

### **ADVANTAGES**

- It provides smoothness, gives water repellency and gloss to paper.
- Specially used for high gloss with soft nip calendar.
- In water base over coating it is use to improve scrub resistance and slip property.
